EA10

ULTRA FLEXIBLE ABRASIVES

FLEX LAP

ULTRA FLEXIBLE ABRASIVES

Micron graded abrasives slurry coated on a highly flexible and soft elastic velour film. EA10 offers a unique flexibility that perfectly follows the shapes of the workedpieces, without creating any sharp or rigid edges. It warrants a micro deburring and great polishing actions without affecting the dimensions and shapes of the parts, providing a clean operation since polishing pastes or compounds are not required. Ideal for manual applications with sheets or rolls.
