SUPERABRASIVES
FILM PRODUCTS**

DIAMOND MICROFINISHING FILM

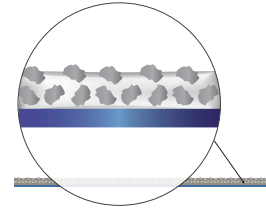

Diamond microabrasives electrostatically coated on high precision 125 µm | 5 mil and 190 µm | 7,5 mil film with anti-slip backing. Due to the sharp diamond structure and the strong resin bond, FD55 gives a fast and aggressive cutting power, high product strength and durability. It can be used either dry or with water emulsion.

- TOP COAT
- ABRASIVE GRAIN
- BASE COAT
- BACKING FILM
- NON-SLIP BACKING

DIAMOND POLISHING FILM

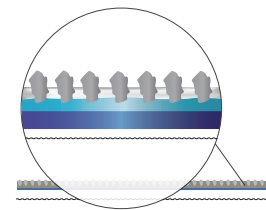

Diamond microabrasive slurry coated on high precision 75 micron film thickness, gives an excellent finish with flexibility and durability on hard materials such as carbides, ceramics, hard metals, minerals, gem stones and glass.

- ABRASIVE GRAIN
- BONDING
- BACKING FILM

MICROFINISHING FILM

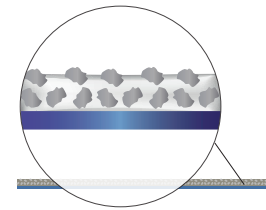

Microabrasives electrostatically coated on high precision 75 micron film plain or 125 micron film with non-slip backing, provide a solution for even the harshest and most aggressive applications, whilst achieving excellent surface finish and consistent results on metals, plastics, rubbers and composites materials.

- TOP COAT
- ABRASIVE GRAIN
- BASE COAT
- BACKING FILM
- NON-SLIP BACKING

POLISHING FILM

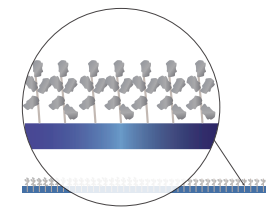

Microabrasive slurry coated on high precision 75 micron film thickness gives an excellent finish with flexibility and durability on metals, plastics, rubbers and composite materials.

- ABRASIVE GRAIN
- BONDING
- BACKING FILM

POLISHING FLOCKED FILM

Polishing microabrasives coated on a soft flocked 75 micron thickness polyester film. Available in fine and superfine grains in a choice of aluminium oxide, silicon carbide or cerium oxide resulting in a perfect finish with enhanced gloss and shine.

- ABRASIVE GRAIN
- FLOCKED PILE
- BACKING FILM
